Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 12, 16, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Learmonth (Understanding and Adjusting Front-end Geometry, reprinted on www.cameronkarting.com/tech-4.htm). Because claim 1 recites only function and no structure, it is the Examiners position that the limitations of claim 1 are met by the well known common go-kart practice of positive caster front end geometry which causes weight jacking. (see 3rd and 4th paragraphs of Learmonth.) Regarding claim 12, it is the Examiner's position that as broadly claimed, a steering king pin exhibiting positive caster constitutes a mechanical assembly.

Allowable Subject Matter

3. Claims 2-5, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claim 20 is allowed.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
